## Projects

### Weather-App

Oct 2023

<https://aanoonymus.github.io/Weather-application/>

- Fully working website created using HTML5, CSS3 and JavaScript, and also adapted for tablet and phone.
- It has a search system and can show the weather forecast for any city, as well as location, air direction, pressure, etc.

## Git-hub

- <https://github.com/Aanoonymus>
- My github if you want to see my other works
